

How to Order

We provide streamlined ordering service for global clients for RF passive components including isolators, circulators, filters, couplers, waveguide components and customized RF assemblies. Please follow the steps below:

1.Submit RFQ

Send your inquiry by email or website message with complete information:

Full part number / detailed specification (frequency range, power, VSWR, insertion loss, interface type)

Required quantity

Sample or bulk order

Target lead time

Destination country & preferred trade term (EXW / FOB / DAP etc.)

Special requirements (testing report, labeling, packaging)

2.Quotation Confirmation

Our sales team will reply formal quotation within 1–2 working days. Check price, lead time, payment terms and Incoterms carefully. Reply to confirm acceptance of quotation.

3.Place Formal Order

You may send official Purchase Order (PO) by email. We will issue written order confirmation after receiving your PO. The order confirmation serves as binding transaction document.

4.Arrange Payment

Follow payment instruction stated in quotation. Send bank slip to our sales contact once remittance is completed. We will arrange production upon receipt of deposit.

5.Production, Inspection & Shipment

We perform electrical testing before delivery. When goods are ready and full balance received, we arrange shipment and provide tracking number, packing list, commercial invoice.

6.After-sales Support

If you have technical questions or quality feedback after receiving goods, contact our team within 15 working days.

Tips

Samples are available for most standard RF models; sample freight can be borne by Buyer.

For customized RF components, technical drawing review is required before order confirmation.

Notify us in advance if you need third-party test certificates.
